

Product Lines

CNC Electric Bending Series | Bending capacity range OD. 18 - 100 mm

CNC 18TDRE

Small diameter tube bender with accuracy and high productivity.

CNC 38TBRE

Machine models with functions of draw-bending and push-bending.

CNC 32MBRE

Machine models with left and right hand bending in one.

CNC 100TBRE(RBE)

Machine models with powerful booster function for tight radius tube bending.

CNC Hydraulic Bending Series | Bending capacity range OD. 38-220 mm

CNC 100/120TSR

3 axes automatic tube benders.

CNC 120TSR-CBF

Custom-built fully automatic processing line
- loader, bending, cutting.

NC Bending Series - 1 and 2 axes | Bending capacity range OD. 38 -175 mm |

50 TNCPB

NC control with automatic rotation and bending. An excellent value for those needing CNC accuracy with low volume work.

A75 TNCB

NC control 1 axis machine.

Twin Heads Compression Bending Series | Bending capacity range OD 38, 50 mm |

F38-90

With in plane and out plane bending functions for symmetric shape bending.

CNC F38-5A

CNC 5 axes compression tube bending machine.

Tube End Forming And Cutting Series

EF30-6

Electrically-driven, multi-hit tube end forming - beading, flaring, expanding, reducing.

REF-20

Tube end grooving machine for ring grooves processing by means of rotary tools.

CT375

NC automatic cutting machine with automatic feeding axis electrically-driven. Cutting head adopts planet gear assembly & inverter with advantage of high productivity.
