

Welding Rotary Disc/Positioning

Can connect with the welding machine for automatic welding.
Disc's manual turning angle: **0° ~ 90°**
Disc diameter: **310mm**, Can work with 3-claw chuck.
Input power: **110V/220V**
Load: **75kg**

Welding Rotary Disc/Positioning

Can connect with welding machine for automatic welding.
Disc's manual turning angle: **0° ~ 90°**
Disc diameter: **310mm**, Can work with 3-claw chuck.
Input power: **110/220V**
Load: **150kg**

Welding Rotary Disc/Positioning

Disc positioning/origin return. Can set the welding overlap time.
Can connect with the welding machine for automatic welding.
Disc's manual turning angle: **0° ~ 90°**
Disc diameter: **310mm**, Can work with 3-claw chuck.
Input power: **110/220V**
Load: **150kg**

Welding Rotary Disc/Positioning

*Can connect with the welding machine for automatic welding.
Disc's manual turning angle: **0° ~ 90°** Tilting type.
Manually work with precision fear for angle changing.
Disc diameter: **500mm**, Can work with 3-claw chuck.
Input power: **110/2200V**
Load: **300kg***

Welding Rotary Disc/Positioning

*Can connect with the welding machine for automatic welding.
Disc's electric turning angle: **0° ~ 135°**
The turning power is driven by motor. High safety and easy operation.
Disc diameter: **600mm**, Can work with 3-claw chuck.
Input power: **220V**
Load: **500kg***

Welding Rotary Disc/Positioning

*Can connect with the welding machine for automatic welding.
Disc's electric turning angle: **0° ~ 135°**
The turning power is driven by motor. High safety and easy operation.
Disc diameter: **1000mm**, Built-in 3-claw chuck for convenient operation.
Input load: **220/380V**
Load: **1000kg***
