

## Cutting line JK 2010

- lengthwise cutting
- cutting-off and sheeting
- JK 9010 is a diversified machine, which makes the work easy and pleasant.
- The assembly can be easily mounted. in working condition in a few minutes.

### Extra equipment

- Automatic plate selector device

The knives of the sheeting cutter are easily adjustable sideways.

Knives can be rapidly changed and added. The stop cam of the measuring device makes it easy to adjust the knives, the scale can be read with accuracy of 1 mm.

The easily maintained electrical control centre has been placed on the side of the machine.

The control buttons for the machine functions, the safety switches and the electronic control unit with a display for different measures are situated in the upper part of the centre.

## Technical data
